Providing training
to educators on
lean innovation
skills for micro
enterprises

An overview of the LIME programme

IS LEAN INNOVATION FOR YOU?

Across the world, accelerated innovation has been core to the survival of many SMEs and micro-enterprises during the Covid-19. Post-pandemic, working out "how to do more, with less" is more relevant than ever in the economic and political environment left behind.

If you **own or manage a business employing less than 10 people**, or if you offer **education, advice and support** to those that do, these resources are for you.

How LIME is changing the game

Innovation is often positioned as the key for smart, sustainable and inclusive growth, but has been difficult to access for micro enterprises because of the high costs. Until now...

All the [resources on the LIME website are free](#) for you to use and share.

Let's work together to **introduce lean innovation skills to our education systems**, and by extension to our economies.

WHAT'S ON OFFER?

1. A speedy self assessment

to help you understand how geared up for lean innovation you are already. Get your "innovation readiness" score in a matter of minutes by completing [this quick multiple choice quiz](#).

How does it all work?

Start by taking the self assessment and then **choose the modules of greatest interest or relevance to you**. There are quizzes, videos and a discussion forum to help you on your way.

2. An online course

designed to help teach micro-entrepreneurs how to become lean innovators in record time. Each module contains [5-6 micro lessons](#) each lasting about 10 minutes. The course covers:

1. Design Thinking
2. Minimal Viable Product (MVP) Approach
3. Agile Outlook

LIME in action

Across Europe, the [Project Partners](#) have been taking Lean Innovation out into their communities, sharing the resources with entrepreneurs and business educators.

3. Curriculum and Open Educational Resources

including a complete set of learning objectives, adaptable [training materials](#) and case studies for entrepreneurship trainers and lecturers. Training providers can now incorporate the principles of Lean Innovation into your programmes!

LIME hit the BIG screen in Spain, where [CEEI Burgos](#) presented the project to a live audience.

In the UK, National Enterprise Network showcased the LIME project and free resources with entrepreneurs and business educators at the UK Multiplier event, hosted by Start-Up Croydon.

In Ireland, [Feltech Software Innovations Ltd](#) delivered a showcase presentation on how projects such as LIME are key to our economic recovery.

Stay up to date and get involved

Connect with this project through our [Facebook](#) and [LinkedIn](#) profiles. We'd love you to **tag LIME in your posts** about how you apply lean Design Thinking, MVP and Agile Thinking.
